

Interactive RadioEpidemiological Program

Summary Report

Date of Run: 6/24/2011
Time of Run: 4:24:06 PM

IREP version: 5.5
Analytica/ADE version: 4.2 64-bit

Information Used In Assigned Share (Probability of Causation) Calculation:

Gender: Female Race (skin cancer only): N/A
Birth Year: 1940 Year of Diagnosis: 2000
Cancer Model: Oral Cavity and Pharynx (140-149)
Smoking history (trachea, bronchus, or lung cancer only): N/A

IREP Assumptions and Settings:

User Defined Uncertainty Distribution: Lognormal(1,1)
Number of Iterations: 2000 Random Number Seed: 99

General Exposure Information:

#	Exp. Year	Organ Dose (cSv)	Exp. Rate	Radiation Type
1	1980	Lognormal (10, 2)	chronic	photons E>250keV
2	1981	Lognormal (20, 1.5)	chronic	photons E>250keV
3	1982	Lognormal (15, 3)	chronic	photons E>250keV
4	1983	Lognormal (15, 1.5)	chronic	photons E>250keV
5	1984	Lognormal (15, 2)	chronic	photons E>250keV

Radon Exposure Information:

N/A (applies only to cases of Lung Cancer with Radon Exposures)

ASSIGNED SHARE (PROBABILITY OF CAUSATION) RESULTS:

Percentile	Assigned Share
1st	0.000 %
5th	1.910 %
50th	14.157 %
95th	38.275 %

99th	50.919 %
------	----------
